

Howard Baker (R-Tennessee) points out the weaknesses of the Carter Administration during Thursday's forum assembly. Baker also urged the audience to become active politically.

Baker attacks democrats

By KENT HORLACHER
Universe Staff Writer
Republican Sen. Howard H. Baker criticized Carter's policies and stressed the need for a Republican congress in Thursday's forum assembly.
Saying that the political party in power has an inherent responsibility for the direction the country takes, Senate Minority Leader Baker said the Carter Administration must bear the blame for its poor performance. The senator also urged members of the audience to remember they had an obligation to contribute to the political system, and they should view politics as a noble and important process.
Baker reminded his listeners that they couldn't expect the leader of Republicans in the Senate to give a non-partisan speech.
'I believe the policies of the Carter Administration, both domestic and foreign, are little short of disgraceful,' he said. Baker was especially critical of Carter's foreign program saying that not only our enemies, but also our friends are unsure of what our policies will be.

Saying that defense was a fundamental issue in the current campaign, Baker said Carter delayed the Minuteman II missile system and the Trident submarine system and scrapped the B-1 bomber.
Baker was also critical of the Congress which has been controlled by the Democrats since 1955.
He said that although the presidency is powerful, it shares its governing strength with the Congress and the courts. 'Congress, not the presidency, is the battleground on which the decisions of this nation will be fought,' he said. Baker added that a \$60 billion deficit will be unveiled by the Democratic Congress following the election.
Baker told the audience of about 3,000 not to view politics in a negative way. 'It is the political system of the United States by which we harvest the demands, desires and dissents of the people,' he said. 'It is in politics that we make the crucial judgements which will shape and form the future of the country.'
Baker also said that all people have a duty to contribute of themselves in the election system. 'We have an obligation,' he said.
Baker said he thinks it is a tragedy that in the last

presidential election, only 50 percent of the people voted. 'To me this means that the quality of politics is only half as good as it could be,' he said.
Some people do not believe it matters which political party is in power, because they feel there is little difference, Baker said. 'It does make a difference,' he said. Baker pointed out that if Ronald Reagan and a Republican Congress were elected, every committee chairmanship in the Senate would change.
Baker ended his remarks by saying the nation has a legacy of the greatest political system of all time, and the nation must capitalize on the free enterprise system. He also said he believes there is still time to restore the defenses of the country.
In addition to being Senate minority leader, Baker is co-chairman of the Senate Select Committee on Presidential Campaign Activities, and a member of the Committee on Environment and Public Works and the Committee on Intelligence. He also holds the distinction of being the only Republican senator elected by popular vote in Tennessee in more than 100 years.

Carter willing to discuss hostage issue with Rajai

NDSOR LOCKS, Conn. (AP) — President Carter said Thursday he is willing to meet with Iranian Prime Minister Mohammed Ali Rajai to discuss the fate of the 52 American hostages 'if he should be amenable.'
Carter's spokesman said the president saw 'no real possibility' of such a meeting.

When reporters asked Carter about a meeting between him and Rajai, he said, 'There's always a potential. We have not made any arrangements to meet with Mr. Rajai, but if he should be amenable to a meeting we would certainly continue to follow our practice of meeting with any Iranian official who had a possibility of speaking authoritatively for their government.'

U.S. Steel-EPA pact included by officials

By DEANA LLOYD
Universe News Editor
People celebrating the win of their favorite football team, U.S. Steel officials and Utah Gov. Scott mused over the signing of a million pollution control agreement between Geneva Steel Company and the Environmental Protection Agency in Salt Lake City.
Following Congressman Gunn's announcement that an agreement was signed Wednesday, U.S. Steel officials and members of Utah's congressional delegation gathered at the capital building Thursday morning to describe the agreement.
The agreement calls for installation of air and water pollution control facilities. The air pollution control facilities, to reduce particulate emissions at the Orem plant, are to be completed by Dec. 31, 1982 and will cost \$10 million. Construction is scheduled to begin in March 1981, according to Guy Huish, Geneva Works superintendent.
The water pollution controls, scheduled as a second phase, will provide additional treatment of the water released into Utah Lake and cost an estimated \$16.5 million. The water controls are scheduled for completion by July 1984.
Geneva and EPA have negotiated over pollution control equipment for more than a year. Twelve months ago the company set an absolute ceiling on acceptable expenditures for air quality controls at \$62.6 million.
The package is subject to final approval by the state of Utah and the air consent decree must be filed in U.S. District Court, Matheson said.
After the decree is filed, there will be a 30 day public notice period which would have to be followed by court approval.
The pollution controls will cost an additional \$17 million in upkeep each year, according to Huish.

Carter was quick to add that there is 'no imminent' prospect of the hostages' release.
Rajai is traveling to New York to participate in United Nations deliberations on the subject of Iran's war with Iraq. The president was to attend a charity banquet in the city Thursday evening.

Asked whether Rajai had expressed any interest in such a meeting, the president said, 'I don't know whether he has or not, nor do I have any information that he has.'

Later, after the president boarded Air Force One following a campaign appearance, White House Press Secretary Jody Powell told reporters that Carter wanted to add that 'I see no real possibility' of a meeting involving the Iranian leader.

Earlier Thursday, Muskie said 'the door is open' to negotiations with Iran over the hostages. But he denied any discussion is under way or deal is in the works.

'There is no such proposal at all,' Muskie said about reports that the Carter administration is prepared to trade military spare parts for release of the 52 American captives.

Asked if any negotiation with Iran is under way, Muskie said: 'No there isn't.'

A few minutes earlier, in a question-and-answer session before the Women's National Democratic Club, Muskie responded enigmatically about the reports of a possible trade: 'I've seen the rumors.'

Reparation advised

Chilly winter lurks nearby

By MARCI NALDER
Universe Staff Writer
Attention up your overcoats and grab antifreeze — the snow line is sliding down Y mountain.
Automobile and health problems affect many BYU students this year. Snow veterans and outsiders alike would do well to be as prepared as possible.
A spokesman for the Utah Highway Patrol said even though the severity of automobile accidents does not increase, their frequency does.
'The first snow storm each year is

always a high accident time,' the patrolman said. 'People just aren't conditioned to the new driving conditions yet.'

The spokesman said excessive speed and not allowing adequate stopping distance cause most winter accidents.

Estimated \$30,000 damage by blaze
An Orem City fireman works to extinguish a blaze that caused an estimated \$30,000 damage to a home at 1565 S. 280 East in Orem about 11 p.m. Thursday, authorities said. A fire department spokesman said the fire started in the garage and 'destroyed most of the interior' of the home.
Firemen said Marta Edwards, who lives at the home, hurt her back while evacuating her children from the burning structure and was taken to Utah Valley Hospital in Provo for treatment. Cause of the blaze is under investigation.

Students get a 'whirl' in campus rotating room

By TAMMI WRIGHT
Universe Staff Writer
Two circular cattle troughs, an old telescope base and a small electrical

motor are all part of the only rotating room on campus.
Approximately five feet in diameter and four feet tall, the rotating room is located at the north end of the Eyring Science Center. It is mounted on a telescope base and stands about two feet above the ground.

Students enter the tiny room by crawling through a doorway cut in the side. Inside, a wooden bench, large enough to seat seven or eight students, circles a small round table.
Once inside, students are warned not to move their heads quickly while the room is rotating, since sudden head movements may cause nausea, headaches or dizziness. A switch inside the room is flipped, activating the motor, and the room jerks into motion, first spinning slowly on its base, then more quickly.
As the speed increases, centrifugal

force pushes students against the wall, making movement difficult, said William Evenson, professor of physics.
'The rotating room is used to dramatize physics principles,' he said. 'It has four speeds and rotates at six to 12 revolutions per minute — about 10,000 times faster than the earth's rotational speed. Because the room is closed off, interpretations of what is happening are not disturbed by outside references.'

Inside the rotating room, Evenson rolled a styrofoam ball across the table. The ball circled around in a short arc.

St. Helens erupts; biggest since July 22

VANCOUVER, Wash. (AP) — Mount St. Helens unleashed a major eruption Thursday night, spewing steam and ash to 30,000 feet, scientists said.

The 10:05 p.m. PDT blast sent a plume drifting south-southwest, said Jim Hocutt, spokesman for the state Department of Emergency Services.

The eruption came just hours after an urgent warning by scientists that the mountain could erupt again.

The warning was issued when more than a dozen earthquakes — including one measuring 3.0 on the Richter scale — shook the mountain earlier Thursday as steam and ash poured from the volcano.

'If it's going to go, it's going to go in hours' or within a day,' Steve Malone, a seismologist with the University of Washington had predicted.

The 'seismic sequence' on the southwest Washington mountain was similar to the events preceding a July 22 eruption, said Craig Weaver of the U.S. Geological Survey.

When the scientists observed what Weaver called 'a real escalation in events,' the Federal Emergency Management agency warned law enforcement agencies that an eruption was 'possible within the next 24 hours,' said agency spokeswoman Joyce Roushoun.

An earthquake at 7:02 p.m. measured about 3.0 on the Richter scale and was centered just beneath the volcano's crater, Ms. Roushoun said.

Small, class B earthquakes have rattled the volcano throughout the week, but the 3.0 quake coupled with continuous steam activity Thursday changed geologists' minds about the seriousness of the recent seismic activity, she said.

Steam mixed with ash accompanied the 7:02 p.m. earthquake, Ms. Roushoun said, with the plume extending 1,000 feet above the volcano. About a dozen small earthquakes rumbled on the mountain after the quake, said Weaver.

A quake of 3.0 on the Richter scale of ground motion is considered just below the level that can cause slight damage in a local area.

Earlier in the day, lazy steam puffs barely cleared the summit of the mountain, and officials said no ash emissions were reported. Early autumn snow clung to the inside of the crater rim at the 8,400-foot level.

Even if you're at the back side of Mt. Timpanogos near the Sun Valley ski resort shows signs of the oncoming winter.

Large deposits of snow were reported in many of Utah's mountain areas.

Algerians struggle after quake

EL AMRA, Algeria — An old man waved his stick beside the unpaired country road. "Stop, stop," he shouted to a passing car. "Come and see my house."

The house was just a pile of stones, like most of the other homes in this village of 12,000 people 40 miles west of the earthquake-ravaged city of Al Annass.

In the hills on both sides of the Chelif Valley, for nearly 100 miles around Al Annass, villages after villages were partly or wholly destroyed in last Friday's earthquake. Rescue officials said at least as many people died in the rural areas as in Al Annass itself, where the official death count has passed 6,000.

The old man said he pulled the body of his 8-year-old nephew from the rubble of his house.

Rev. Abernathy backs Reagan

One of the nation's best known black leaders gave Ronald Reagan a surprise endorsement Thursday, while the White House disavowed a claim by another prominent black, Andrew Young, that Reagan's campaign rhetoric means "it's going to be all right to kill niggers when he's president."

With President Carter and his GOP rival campaigning their way toward a joint evening appearance at a charity dinner in New York, White House spokesman Ray Jenkins said Young's statement last week "does not represent the president's view."

The Rev. Ralph David Abernathy, like Young a close associate of the late Martin Luther King Jr., offered his endorsement at a news conference in Detroit with Reagan and GOP vice presidential candidate George Bush.

Karmal welcomed by Soviets

MOSCOW — President Babrak Karmal of Afghanistan held face-to-face talks Thursday with his backers at the Kremlin for the first time since the Soviet military helped install him in office 10 months ago.

Karmal, also the leader of the ruling People's Democratic Party and premier, was greeted at Vnukovo Airport by a full lineup of Soviet officials.

led by President Leonid I. Brezhnev and was driven into the city along streets lined with people, flags, streamers and banners, Soviet television reported.

Search on for missing youth

ATLANTA — Police began organizing door-to-door foot patrols Thursday and community leaders signed up volunteers for weekend searches as the investigation intensified in the unsolved slayings and disappearances of 14 black children.

The action came one day after police revealed that the body of a youth found in 1979 has been identified as one of six black children previously listed as missing.

The identification of the body of Alfred James Evans, 14, of Atlanta, brought to nine the number of children under age 15 killed in Atlanta or south suburban East Point in the last 15 months. Five other black children are still missing.

The decomposed body of Evans, who was suffocated, was found last July four days after he disappeared, but positive identification by dental records was not made until Wednesday.

Beefed-up guard quells violence

STARKE, Fla. — A beefed-up guard force conducted a cell-by-cell search Thursday of Florida State Prison, home of the nation's most populous Death Row, in an effort to quell intermittent violence that has left one guard dead and two injured.

"It's calm in there," said Corrections Department spokesman Vernon Bradford. "The institution is under total lockdown." In a lockdown, "everybody stays in their cells. There is no movement," Bradford said.

The prisoners inside the 19-year-old institution will remain locked in their cells indefinitely, Bradford said.

Utah-Decreasing chance of showers today and not so cold. Partly cloudy tonight and Saturday. Lows upper 20s and 30s. Highs today upper 40s, 45 to 55 Saturday.

ASBY plans orientation

By NOLAN CRABB
Assistant News Editor

For most first-year BYU students, college life has become relatively familiar. But Monday marks the first day of classes for 909 new freshman and transfer students and will bring about additions to the class loads of current students.

Under the direction of ASBY Vice President Kevin Frunk, a block welcome assembly has been planned which Frunk said would help new students be better oriented to campus life.

Frunk said letters have been sent to the new students inviting them to the assembly.

"This is the first year we've had a large-scale formal orientation for the new students coming in on the block," Frunk said. "We took a look at the number of new students coming in and decided there was a real need for this kind of program."

The assembly will be held in the Varsity Theater ELWC, at 1 p.m. Friday.

The assembly will begin with a speech from David M. Sorenson, dean of student life. Sorenson will represent the administration in welcoming the new students to campus.

The students will receive a tour of campus via a slide presentation,

which stars Cosmo on a field trip through campus, taking a close look at the clubs and organizations.

Following a speech by ASBY President Jeff Duke welcoming new students on behalf of ASBY, another slide presentation will be shown by the advice centers.

"We want the new students to know what's available to them on campus," Duke said.

Frunk said the orientation was organized a week ago after the ASBY leadership saw the statistics of incoming students.

"We've never done this before for the block students, so we hope it will run smoothly," he said. "We're also hoping for a big turnout. Posters have been put up in the advice centers and we intend to hand out pamphlets giving students a better idea as to the number of things they can become involved in here."

Frunk said a large number of the students are former missionaries who are interested in returning to school as quickly as possible. Still others may have had problems with registration in the fall and were

unable to meet the fall deadline.

"Our main interest with the orientation assembly," he said, "is to provide students with the help that will make their arrival here and

the first few days of easier. Those of us here are already established in academic and a routines. The new students have to all play a catch-up game."

We stand corrected

The Daily Universe regrets the inaccurate information printed in the article "Latin School 'resides' in old dormitory."

The English Language Center is the correct name of the school of English for foreign students.

We apologize to Glen Probst for quoting him. He never spoke to a Daily Universe reporter. His correct title is coordinator of instructions.

Ray Baird is the director of the English Language Center.

Conference views family relations

By RUTH HAMILTON
Universe Staff Writer

The Ninth Annual BYU Family Research Conference opened yesterday morning and will continue today starting at 8:30 a.m. Sessions will be held throughout the day. The conference is free of charge to the public, with most sessions being held in the Varsity Theater of the Wilkinson Center.

Family experts from coast to coast are discussing "family stability and instability." Lecture topics in today's sessions include "The Incomplete Sexual Revolution: A Search for Meanings," "Unconscious Factors in Mate Selection," "Home Production and Family Stability — A Reciprocal Relationship," and "The Federal Budget and the American Family."

Keynote speaker at the opening session was Dr. Selma G. Miller, an expert on marriage and family therapy with a private family therapy practice in New York City. She is also on the board of directors of the American Association for Marriage and Family Therapists.

Her address dealt primarily with an overview of marriage separation and divorce. She stated that in 1979 one out of five children were living in one parent homes, and that separation is a part of everyone's life, whether it be separation from parent or from mate.

When people marry, many expect a spouse who is a permanently accessible attachment figure. They feel ill-equipped on their own, said Miss Miller. "Those who don't think they can make it in the world can have the same insecurities as a young child."

When people ex-

perience a separation they are usually prepared for the pain but are usually unaware of the emotional and psychological consequences, said Mrs. Miller. Physical problems resulting from a separation are not unusual. Weight loss resulting from lack of appetite, illness because of lack of sleep, back trouble and intestinal upsets can occur.

"Separation also involves coping with the emotional effects of a disillusionment," said Mrs. Miller. She concluded her talk by examining problems that occur after separation. "To resume a new life after separation is painful," said Mrs. Miller. "Adolescent inadequacies surface due to lack of confidence."

The conference is being sponsored by the BYU Family and Demographic Research Institute with assistance from the College of Family, Home and Social Sciences.

Geneva

Continued from page 1

Matheson and L.F. Gier, vice president and general manager of U.S. Steel's Western Steel Division, credited the combined effort of the Citizens Coalition to Save Geneva, union members and Utah's congressional delegation with making the settlement possible.

"In my 13 years in government service, I have never seen an effort with so much cooperation," Sen. Jake Garn said.

"We should put everyone on the back," Matheson said during the course of the press conference. Matheson recognized coalition and union leaders, along with members of the congressional delegation and state officials.

"Great credit should go to the workers at the Geneva plant, they have been persistent in their efforts," Garn said. "They have saved their own jobs."

"Still there are some other problems that need to

be solved at the federal level," he said.

According to Garn and Congressman Dan Marriott, the federal government needs to look at imported steel, especially Japanese, to prevent dumping of the steel on the American market. The federal government should also look at the depreciation schedule and encourage modernization of steel plants, Marriott said.

The new EPA-Geneva agreement calls for several changes in the Geneva plant. Geneva is to build a coke plant shed as long as four city blocks and as high as a five-story building. It will cover the dumping side of the plant's four coke oven batteries, according to Jack Bollow, Geneva spokesman.

Other improvements will supplement other air and water cleaning systems, improving the quality of the air and water discharged from the plant, Geneva officials said.

ROTATE

Continued from page 1

"Actually, the ball rolls in a straight line and the table moves in a circle underneath it," he said. "Because of the motion of the room, the ball seems to curve. This is known as the Coriolis Force."

"It demonstrates very well the fact that Newton's laws are not valid if you are making measurements in a rotating reference frame," he said. "Things happen which can only be described by fictitious forces — forces that appear to work but are not really there."

Barnett said he would like to see a better rotating room built and put inside the Eyring Science Center so the experience would be available to more people.

"But several thousand dollars would be required to

build a larger, automatic, mechanically stronger room," he said. "I don't know whether the university would feel such an expense was justifiable."

The Coriolis Force is inversely proportional to speed, Evanson said. The greater the speed of the ball, the less the curvature of the ball, he said.

"The military has to correct for the same force when shooting missiles over long distances," he said.

Reaching up, he loosened a small pendulum hanging from a string centered in the ceiling. The pendulum swung from side to side, changing direction rapidly.

"This is similar to the way the movement of the earth affects moving objects," he said. "The earth's rotation causes a pendulum to change direction very slowly. You just see the physical effects much more dramatically than normal."

Centrifugal force is also demonstrated in the rotating room, he said.

Although it is difficult to use the rotating room for large classes, Evanson said he uses it for any physics courses which involve mechanics.

"My junior-level physics mechanics course involves a lot of mathematics," he said. "I bring my students to the rotational room to see what the mathematics mean."

The rotational room has been in use for about five to seven years and cost several hundred dollars to build, said Wayne Peterson, demonstration supervisor for the department of physics.

"It is used by honors classes, physics classes and physical science classes," he said. "It's quite an interest getter for Science Day — a day sponsored by several science departments which gives high school students a look at the sciences."

Bill Dibble, professor of physics and associate director of the honors program, said he uses the rotating room every year to demonstrate to his honors classes the effects of an accelerated reference frame.

"I first used it about four years ago," he said. "The students ate it up."

The rotating room is a great teaching device, said Dean J. Barnett, professor of physics and astronomy.

Provo police seek robbery suspect

About 5:30 p.m. Thursday a man of stocky build with shoulder-length brown hair pulled a small-caliber pistol on the manager of the Silver Fox Camp Ground at 1500 S. and 100 West in Provo and took between \$100 and \$300 in cash from the cash register, Provo Police reported. Police are searching for the suspect.

Crucial games tighten WAC race

By DOUGLAS MURPHY
Universe Staff Writer

The leading teams in the WAC championship race will be playing crucial games this weekend as BYU, Utah, and Colorado State University all take to the field.

The Cougars will be traveling to Logan this weekend to challenge 2-3 Utah State in the second game of the Beehive Bowl, the contest for the football supremacy. In the first game for the "hot" this year, Utah came from behind to whip the Aggies, 23-19, in the last 25 seconds of the game.

Both teams were victorious last weekend as BYU defeated Wyoming 52-17, and USU defeated Fullerton State, 28-17.

The game, at Romney Stadium in Logan, will be televised by ABC and broadcast regionally into the states.

Utah, co-leader in the WAC race with undefeated 10-0, will be going to Wyoming this weekend to face the Pokes' wishbone offense, an offense that didn't do too well against BYU last weekend.

Wyoming and Utah are rated as the top two running teams in the WAC. Wyoming with its wishbone offense is ranked first, and the Utes, using an I formation, is second best in the conference.

While Utah is on a four-game winning streak, Wyoming has lost its last two games after winning

the first three of the season. The game, in Memorial Stadium in Laramie, will mark the 53rd meeting between the two schools.

CSU, also undefeated in WAC play after a surprise win against New Mexico last weekend, will be traveling to San Diego.

San Diego, picked in the pre-season polls as a probable contender for the WAC title, stumbled to a 1-4 start. CSU was in the also-ran category, but in spite of being outscored 177-39 in three non-league games, finds itself standing atop the WAC pack. CSU will be hoping to keep that position this weekend.

Hawaii will fly stateside this weekend, meeting New Mexico Saturday night in Albuquerque. The Lobos, upset last weekend by CSU, now are in a must-win situation. New Mexico may have a difficult game after losing quarterback Brad Wright, who suffered a broken collar bone last weekend.

On the national scene, the University of Washington will be playing 20th-ranked Stanford in what should be an exciting game.

BYU vs. UTAH STATE
Becky Collier — BYU by 14.
Marlyn Hansen — BYU by 17.
John Jackson — BYU by 20.
Craig Jenkins — BYU by 20.

Craig Jenkins — 12 out of 20.
Gordon Monson — 10 out of 20.
Douglas Murphy — 14 out of 20.
Anne Thornton — 12 out of 20.
Kent Tingey — 10 out of 20.

Logan was training ground for Edwards, Hall, Ramage

By KENT TINGEY
Universe Staff Writer

When BYU steps onto the football field Saturday in the annual Wagon Wheel clash the surroundings won't be all that unfamiliar for three Cougar coaches.

LaVell Edwards, Garth Hall and Tom Ramage all have roots in the Cache Valley school.

Each of them either coached, played or did both for the Ags.

Utah State has been a breeding ground for good players and coaches. It hasn't been so long ago when the Aggies were the dominant gridders in the state. All three former Aggie gridders still remember times when they drilled the Cougars.

But now their allegiance has changed. It has to. It is no longer those sweet memories and good times at the Agricultural College. The task at hand is to win ball games. As Hall so aptly put it, "My loyalties were to USU until I got my first check from BYU."

Edwards chose USU

Edwards, an Orem High School product, decided to go north to Logan for his education. He went to USU on a football grant-in-aid but also played freshman basketball.

After that first year he geared all his efforts to the gridiron and it paid off. As a 190-pound center and linebacker, Edwards won All-Skyline conference honors two consecutive years.

"I went to Utah State because it was more of a football power in those days," Edwards said. He also mentioned that in those days recruiting was not as intense as it is now.

After his graduation, Edwards went in the Army for two years and then coached at Granite High in Salt Lake City for eight years. He then came to BYU and his loyalties switched to the Provo school.

No ties left

When assessing the game this week Edwards indicated that it was not more meaningful than any other game. "Playing them is not a real big factor because all my ties are gone. But as my Alma Mater I am happy to see them win any other time," Edwards said.

Hall went to USU from Highland High in Salt Lake City. He selected USU because he felt the school had the best in-state program at the time. Hall played wide receiver for the Aggies and was named Academic All-American his senior year at the Logan school.

After graduation he stayed at USU to earn a master's degree as a graduate assistant in football. Following that year, Hall was named a full time assistant coach. After two years on the Aggie staff he decided to leave. He became the offensive coordinator at Wake Forest University and remained there three years before coming west to BYU.

Hall said he enjoys returning to Logan to meet the Ags. "I don't think this game is any bigger than the other games. I do have a lot of close friends at USU and look forward to playing there and renewing these acquaintances."

LAVELL EDWARDS

Hall also tells of a humorous incident he observed while he was coaching the Aggies. As a rookie coach, Hall was leaving the press box after the Cougars had just defeated the Ags in Logan. As he stepped onto the field he noticed a BYU player arguing with the Aggie equipment man about who got the game ball. The BYU player had earned the ball but the equipment man refused to give it away. That BYU player now shares a coaching office with Hall. Mel Olson, an assistant line coach, was that player.

The third member of the Aggie-turned-Cougar coaching staff is Tom Ramage. Ramage was an All-conference tackle for the Aggies and later coached at the school. Ramage now coaches the defensive line at Cougarville. He has been the mentor of what Edwards feels are some of the best defensive lines in BYU history.

One thing for sure. These three former Aggies will completely "forget" their former ties come game time Saturday.

Saturday contests cancelled

All Saturday BYU intramural football and afternoon basketball games have been cancelled, according to Peggy Mansfield of the BYU Intramural Office.

The games were cancelled due to the opening of deer hunting season and the regionally televised BYU-Utah State game.

Miss Mansfield said those team wanting to play Saturday may sign up in the intramural office, 112 RB.

Intramural basketball games will be played from 8 a.m.-1 p.m. on Saturday.

Entries are now being taken for men's handball singles, men's and women's badminton singles, and men's and women's indoor soccer, according to Miss Mansfield. Registration will close Oct. 23.

Men's single elimination and women's double elimination soccer tournaments begin Tuesday.

Women spikers cancel one of two

The women's volleyball team will meet Colorado State today at 7 p.m. Their Saturday game with Wyoming has been cancelled due to poor weather conditions. The match with Colorado will be played on the Smith Fieldhouse main floor.

LOST AND FOUND SALE AND AUCTION

Saturday, October 18, 1980
10:00 a.m. to 12:00 noon
Main Ballroom — ELWC

New Line Control Policies

Numbered tickets will be available at 7:30 a.m. by the northeast entrance to the Ballroom the day of the sale. This will be done on a lottery basis. The ticket number you draw will determine your place in the line for gaining admittance to the sale. The number of people in line at 7:30 a.m. will be determined and a matching number of tickets will be scrambled for the random drawing. This means that coming earlier than about 7:30 a.m. will not give you any advantage. Those who come after 7:30 a.m. will receive a numbered ticket in the order in which they came. All ticket holders must be back in the line at 9:30 a.m. The sale starts at 10:00 a.m.

Juniors & Seniors Go Hire Yourself An Employer

Do you want a \$2,000/year raise before you start work? Then take:

Career Education 317

Career Skills (1:0:1)

Enroll now for fall semester, 2nd Block

We cover the following topics:

- How to decide what you want
- How to investigate the companies you choose
- How to dress for the interview and later employment
- How to prepare your letters and resume
- How to interview
- How to negotiate your contract
- How to succeed on the job thereafter
- How to never be out of work
- How to build a financial power base for the future

To accomplish this, start now!

Why spend \$40,000 getting a degree (money spent plus money not earned) and not spend a few hours learning the simple but powerful techniques that will help you get what you want?

Attend a free preview seminar Friday, Sept. 5 2-4 p.m. RM 321 ELWC. For details contact Career Education Department Ext. 2687, 140 BRMB

Don't Forget Block Registration Deadlines!

Entertainment

'Merchant of Venice' a success

By KIM KAATMAN
Entertainment Editor

Shakespeare's "The Merchant of Venice" is a straight forward play about justice and mercy being presented in the Pardoe Theater through Nov. 1.

The fate of one venetian merchant hangs in the balance when the scales weigh too heavily on the side of justice leaving no room for mercy.

Antonio is the merchant who is indebted to Shylock, the money lending Jew. Antonio borrows money from Shylock so his friend Bassanio can travel to Belmont and compete for Portia's hand. A bond is drawn between Shylock and Antonio specifying that if the debt is not paid "on a certain day" the Jew will extract one pound of flesh from the spot closest to Antonio's heart.

Bassanio wins Portia, (Bassanio's friend Gratiano wins Portia's maid Nerissa), Jessica, the Jew's daughter, marries Lorenzo, a Christian, and Antonio's ships wreck leaving him indebted to Shylock — the grieving father.

Antonio sends a letter to newlywed Bassanio in Belmont informing of him of the inevitable death. Moved by the news, Bassanio and his colleague Gratiano leave their wives to attend the court hearing with Antonio. Unknown to them, Portia and Nerissa impetrate lawyers, defend Antonio and win the case. Shylock is sentenced to become a Christian and loses all of his wealth, but escapes with his life — a gift of mercy he was not willing to bestow upon Antonio.

In her defense of Antonio, Portia pleads with Shylock to show some mercy, she says,

"Though justice be thy plea, consider this,
That, in the course of justice, none of us
Should see salvation: we do pray for mercy,
And that same prayer doth teach us all to render
The deeds of mercy."

In the end, "he that gives and hazards all" triumphs.

The BYU production of "The Merchant of Venice" is justifiably another main stage triumph, and Mr. Bernard Brown, a professional actor in residence at BYU as an instructor, director and actor is the winning element in "The Merchant of Venice."

His interpretation of the play was straight forward and powerful. The costume design, set design, and lighting supported this interpretation and the cast rallied behind Brown in an effort that was definitely successful.

Miss Jennifer Olauson, most recently seen as Lucy in "Dracula," played the female lead of Portia with ease. Backstage after the curtain went down, Brown embraced his leading lady and said, "You were born to be an actress."

Mr. Greg Newman swooned over Portia in a most convincing way. His portrayal of Bassanio had a flavor of comedy and a feeling of amusement that was

easily identified with by audience members.

Worthy of mention along the comic lines is Mr. Niel Webster's presentation of Launcelot Gobbo, the servant who changes sides. His physical and verbal characterization of this exorable servant added the necessary balance between comedy and tragedy needed for relief.

Costumes for this show were built entirely from scratch. Miss Janet Swenson expressed her satisfaction with the seven racks of 1740's costumes by saying, "It's the most beautiful show we've ever done." She added, "Brother Brown is also the most patient director I've ever worked with." All members of the cast wore wigs, requiring four assistants who worked entirely with the wigs.

The set for this show featured a raked stage, a set of flying arches (the largest used at BYU) and a

lovely throne set that also flies. Mr. Charles Henson designed the set and said he too enjoyed working with Brown in relation to the construction of the set. "He wrote me several letters specifying the type of set he envisioned. It was a joy to work with him. I also designed the lighting for this show, and as I watched the rehearsals time and time again, I never became bored — it's an excellent show." (Running time for this show is almost three hours.)

The audience at the opening night performance responded well to the cast and seemed to enjoy the production. Watching Brown on stage and viewing a show he directed is an experience worth having. The tickets for "The Merchant of Venice" are selling quickly. If you missed the Shakespearean Festival in Cedar City take advantage of this fine BYU production.

Bernard Brown (Shylock) and Liza Zenni (Jessica) appear as father and daughter in "The Merchant of Venice." Brown also directed the play, which is being performed through Nov. 1, in the Pardoe Theatre.

Wet weekend activities

DRAMA
"Merchant of Venice"
— English actor, Bernard Brown starring;
Oct. 17-28 and Nov. 1, 8 p.m., Pardoe Theater, HFAC

FILMS

Bond books to feature super-spy but 1980s look

LONDON (AP) — James Bond is coming back, still with his 007 license to kill but otherwise with a 1980's flavor. He will be a little more respectable to women, consume fewer vodka martinis and smoke low-tar cigarettes.

John Gardner, British writer of best-selling mysteries, has been selected by the late Ian Fleming's literary executors to bring Bond back to life in three books.

"We are picking up Bond from where we left him in the '60s and bringing him into the '80s," Gardner said in a telephone interview from his retreat in Ireland's Wicklow Mountains.

When Fleming died in 1964, aged 56, he was correcting the proofs of his 14th Bond book, "The Man With the Golden Gun," which was posthumously

published. Later, two of his short stories were published under the title "Octopussy."

Gardner, 54, said the invitation to bring Bond back "is a challenge, especially on the technical side. I will enjoy it as a relaxation from my other work. I like to write one serious book and one of mystery or spy fiction each year."

His first Bond book, provisionally titled "Meltdown," has been written, and publication is set for next April, the time of year Fleming's books were always launched.

Gardner would not reveal the plot, saying he had been told to keep it secret. But he did indicate it was the traditional fight between good and evil, with Bond assigned to save the world.

Gardner said Bond will be pitted against an individual with immense resources and a nasty streak whose malignant activities have to be stopped.

"We have kept to the

Bond formula. He loves his country and his service. Naturally there was a clearout of the '00' service following the defector scandals, but fortunately Bond came out clean," Gardner said.

The enigmatic spymaster "M," who sends Bond on his missions, will be back behind the desk.

Miss Moneybags, still unmarried, will wait faithfully to back up Bond and to mother him when he returns, scarred but triumphant over the forces of evil.

"We won't age them, but we have to fit them into the '80s. We hope readers will see him as the Bond they remember," Gardner said.

"But times have changed. There won't be so many casual girls — we've had the effect of women's lib meanwhile. Also Bond won't drink so many vodka martinis. He's cut down smoking too. He now favors low tar cigarettes, but still has them specially made for him."

JOBS IN HAWAII

Supervisory jobs in Hawaii

Youth Developmental Enterprises (YDE) is now hiring adult males to supervise teenage young men on the pineapple plantations in Hawaii. Job openings for 1981 are from March 12 to August 29, 1981 and from June 10 to May 25 to August 29. Pay is approximately \$1,000.00 to \$1,225.00 per month plus free room and board. Those hired have some expenses for air fare and a 7-day tour at the end of the program season. Incentives are available to all supervisors to help offset these expenses.

For an orientation appointment and interview call the Department of Recreation Management and Youth Leadership at 378-4369 and ask for Debbie or call the YDE office in Salt Lake City at 268-4333. These orientation interviews will be on Monday, Oct. 20th and Tuesday, Oct. 21st in room 210 of the Richards Physical Education Building, BYU Campus from 9:00 a.m. to 4:00 p.m. YDE has been in the service of youth for over 10 years. Come learn how you might become involved.
